

Kajeet SmartBus™ 900

Quick Start Guide

1 Setting Up the Router

NOTE: All SIM cards are pre-installed.

- A. Screw in paddle antenna (A) to the MAIN port.
- B. Screw in second paddle antenna (B) to the AUX port.
- C. Screw in the GPS antenna (C) to the GPS port (if purchased).
- D. Screw in two Wi-Fi antennas (D) to the 2.4/5GHz ports.
- E. Plug either the DC Power Supply cord or the AC Power Supply cord in the 4-pin square (details on the back).

Router LED Light Explanation

-  **Power:** Green = Powered on
-  **Wi-Fi:** Green = On and operating normally
-  **GPS:** Blue = GPS locator is on

-  **Modem:** Solid Green = Active Connection
-  **Signal Strength:** Blue = 4 solid bars is the strongest signal

2 Power Options

DC Power Supply

NOTE: If your vehicle does not have a vehicle adapter, use the AC Power Supply cord.

Plug the cord in to the 4-pin square. Plug the opposite end into the vehicle adapter. Turn the bus on to power on the router.

AC Power Supply

NOTE: This is for use in any location with an outlet.

Plug the cord in to the 4-pin square. Plug the opposite end into an outlet. The router will power on.

NOTE: The **Modem LED** must be solid green to indicate active Internet connection.

3 Connecting to Wi-Fi

TIP: The device will turn on as soon as it is plugged into a power source. The router may take up to 3 minutes to power up before your students can connect.

NOTE: If you requested a custom SmartBus configuration, you will use those details to connect.

If you did not request a custom configuration, the login information is:
